Availability: May 2027 – June 2028

PROFESSIONAL SUMMARY

NTU Computer Science undergraduate with experience in full-stack development, backend integration and workflow automation. Developed web application features using React, Node.js, Express and MongoDB, integrated an LLM API for scam-pattern analysis, and conducted system vulnerability assessments.

SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, C, C++, PHP, R, SQL
- **Frontend:** React, HTML, CSS
- **Backend:** Node.js, Express, Next.js
- **Databases:** MongoDB, Supabase, Firebase, SQLite, SQL Server, MySQL
- **Tools & Deployment:** Git, GitHub, Vercel, Linux
- **Security:** Vulnerability Assessment, Penetration Testing
- **Automation:** Microsoft Power Apps, Power Automate

EDUCATION

Nanyang Technological University, Singapore Jul 2025 - Jul 2029 (Expected)
Bachelor of Computing, 4.01/5.00

- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Design and Programming, Software Engineering

Temasek Polytechnic, Singapore Feb 2019 - Apr 2022
Diploma in Information Technology, 3.78/4.00

- Relevant Coursework: Year 1: Computational Thinking, User Experience and Interface Design, IT System Security Essentials, Data Structure and Algorithms, Coding and Development Project, Object-Oriented Analysis and Design, Mobile App Development, Full Stack Web Development, Software Quality Assurance, Microservices, Machine Learning for Developers, IoT Application Development

WORK EXPERIENCE

The Digital Intelligence Service (National Service) Sep 2023 - Jul 2025
Cyber Security Specialist & Logistics Administrator

- Conducted system vulnerability assessments, identified security weaknesses, and recommended remediation measures to improve system security.
- Developed a barcode-enabled asset-transfer application using Microsoft Power Apps and Power Automate to digitise equipment transfers previously handled through a paper-based workflow.
- Managed inventory checking and equipment replenishment.
- Compared product specifications and pricing to support cost-effective purchasing decisions, and coordinated procurement and delivery with vendors.

INTERNSHIP EXPERIENCE

GovTech Apr 2021 - Jun 2022
Software Engineer Intern

- Developed frontend and backend features for a smart-facilities management web application using React, Node.js, Express and MongoDB.
- Integrated Form.io management forms using an iframe, allowing users to access forms within the application without navigating to a separate domain.
- Implemented team-requested application improvements and investigated software defects.

PROJECTS

Defence Science and Technology (DSTA) BrainHack Hackathon - Finalist May 2026 - Jun 2026
Team Member

- Developed backend API routes using Next.js and Supabase to manage scam submissions, community votes, and user data.
- Implemented JWT-based authentication and API middleware to verify tokens and identify authenticated users across protected routes.
- Integrated Groq's LLM API to analyse submitted text and return structured scam-category predictions, suspicious keywords, and explanations.
- Implemented community-voting logic to validate votes, prevent repeat voting, determine winning scam categories, and award points to qualifying voters when voting closes.
